PBS-001 PERSONAL BIOMETRIC SAFE

ABOUT LOCKSAF

LockSAF is an innovative way to store your personal firearms and valuables safely. Unlike common lockboxes with conventional locking mechanisms, LockSAF utilizes the latest biometrics technology to provide foolproof security and convenient access at the same time.

Biometric technology is being used every day as a primary security measure. Fingerprint recognition is highly regarded as an accurate means of identification because every human fingerprint is unique. The biometric locking system uses this fact along with advanced technology to only allow access to authorized individuals.

In today's world where we know so much can go awry even with the best intentions, LockSAF will give you security, peace of mind, and safety helping protect you, your loved ones, and your prized possessions.

PRODUCT DESCRIPTION

The **LockSAF PBS-001** is designed to protect and give quick access to your firearm and valuables. Easy to program and to use, it takes one press of a button and a programmed fingerprint to open. Made with 9 gauge steel to provide a strong tamper-proof box, each safe is easily mountable to a wall, the inside of a drawer, or any flat surface with the 4 pilot holes in the bottom panel. This added feature secures the safe and helps keep it out of harm's way or from unwanted curiosity. Although hardware is not provided, the unit will take any bolt up to 10mm that can easily be purchased at your local hardware store. Bolt length is dependent on the mounting surface. Additionally, the flip top provides easy access without being hindered by an enclosed space. The interior dimensions will allow storage for items up to 12 inches or 30 cm in length. The PBS-001 fingerprint reader is located on the front panel of the safe. Each unit requires and is provided with a standard 9V battery that is located within the same panel under an easy access cover.

All LockSAF products come with a 30 day customer guarantee and 1 year limited warranty. If you are dissatisfied at all within the first 30 days after purchase, please feel free to return and receive your money back. Every PBS-001 is guaranteed against manufacturer defects for one full year.
